**F. Nigel Hepper : Illustrated Encyclopedia of Bible Plants** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Illustrated Encyclopedia of Bible Plants:

2 of 2 people found the following review helpful. We finally found this book again!By Lucy the Bargain HunterMy husband had this book, then lent it out to a neighbor who never returned it. It was the only one of the bunch that the neighbor didn't return when asked. I am sure the neighbor didn't actually lose it; I believe he just didn't want to give it back. Understandable. This is a great book, and is out of print. I have been searching for another copy of this book for years and was so glad to finally find it used at a reasonable price. My husband, an avid gardener, treasures this book.

The definitive volume on Biblical plants. Bible plants are native to the Mediterranean climate (gold arrows). Mediterranean plants will also grow easily in Marine climates (green arrows). They may be tender in your area. Check the Substitution List to find species that will thrive in your garden. Mediterranean plants must have good drainage and protection from hard freezes. They do best in lean soil with little summer water and most are deer resistant. F, Nigel Hepper, a world authority on plants of Bible lands, has made numerous visits to Israel and the surrounding countries, advising local botanists, lecturing and photographing. He helped establish the Biblical garden at St. George's Cathedral in Jerusalem and was the Principal Scientific Officer at the Cathedral of the Basilica.
