**Franz-Xaver Reichl, Leonard Ritter, Jochen Benecke, Herbert Desel, Jrgen Durner : Illustrated Handbook of Toxicology** before purchasing it in order to gage whether or not it would be worth my time, and all praised Illustrated Handbook of Toxicology:

The Illustrated Handbook of Toxicology is an impressive introduction to the complex field of toxicology. It also serves as a hands-on guide to various poison treatments and offers supplemental public health information.Each two-page unit features concise text on the left complemented by full-color illustrations on the opposing page. The expert author distinguishes harmful toxic substances and catalogues their specific effects on the human body, plants, animals, and

the surrounding environment. The handbook also addresses cutting-edge topics, including biological warfare, modern toxicological methods, and threshold values. Features: Succinct, user-friendly organization allows readers to navigate the content with ease Over 500 detailed images and diagrams arranged on 150 full-color plates illustrate exposures and toxicological effects on humans, plants, and animals Well-researched, objective risk analysis on toxic exposures accompanies relevant images Extensive glossary of key toxicological terms provides readers with the accurate information they need to avoid dangerous confusion This is the ideal text for all medical students who want to supplement the toxicological information covered in their coursework, as well as for first responders to chemical accidents and poisonings.

""The textbook is nevertheless a delight to read and look at." The Bulletin of the Royal College of Pathologists July 2011 "The textbook is nevertheless a delight to read and look at. The Bulletin of the Royal College of Pathologists July 2011 "The textbook is nevertheless a delight to read and look at. The Bulletin of the Royal College of Pathologists July 2011 "From the Back Cover The "Illustrated Handbook of Toxicology" is an impressive introduction to the complex field of toxicology.
