A key resource for academics and others studying images and their interpretationBy Midwest Book ReviewIMAGES; A READER is a key resource for academics and others studying images and their interpretation: it gathers some 80 key readings from disciplines ranging from literature and science to cultural studies and art, surveying the history of images from the Bible to the present and blending classic treatments with recent new research on the topic. College-level collections, whether art history holdings or cultural studies collections, will find it intriguing.

Images: A Reader provides a key resource for students, academics, practitioners and other readers engaged in the critical, theoretical, and practical study of images. The Reader is concerned with the notion of the image in all its theoretical, critical and practical contexts, uses and history. It provides a map of the differences and similarities between the various disciplinary approaches to images, breaking the ground for a new interdisciplinary study of images, in the arts and humanities and beyond. The selection of over 80 key readings, across the domains of philosophy, art, literature, science, critical theory and cultural studies tells the story of images through intellectual history from the Bible to the present. By including both well-established writings and more recent, innovative research, the Reader outlines crucial developments in contemporary discourses about images.

"Images; A Reader is a key resource for academics and others studying images and their interpretation. College-level collections, whether art history holdings or cultural studies collections, will find it intriguing."--James A. Cox (06/01/2007)The sheer breadth of this collection - from Genesis to Hockney and Plato to Lacan - shows how much images have always been a part of our culture. This volume makes a welcome contribution to our (re)discovery of the visual in society and how much we stand to learn from it, past and present.--Richard HowellsThis is just what visual studies needs: a sober, analytic, parsimonious selection of crucial texts.--James ElkinsThere are many fine anthologies on visual culture, yet none that offer such a concise and comprehensive array of the theoretical perspectives defining this interdisciplinary field.--Robert HarimanAn indispensable resource for image analysis. The best thing I have seen in this field by a long way.--Valerie WalkerdineThe editors make two particularly useful contributions to the anthology. At the outset of each section, an introduction effectively summarizes and presents key issues for that section's readings, relates dominant themes to those earlier or later in the anthology, and outlines the significance of the individual excerpts in terms of the editors' proposed field of image studies. Aware of the bias with which they may have compiled the volume, however, the editors also have chosen to include four alternative tables of contents that fall at the end of the book's general introduction... Accessible and well-organized, these alternative tables go far in exemplifying the extent to which the editors wish to open up the field of inquiry in the study of images.--Mark AndrewsMuch theorizing in visual studies, visual anthropology, and visual culture is offered in an a-historical vein, sliding along secondary and tertiary conceptual trajectories, with little sense of interdisciplinary origin. This book recovers the historical grounds of the study of 'images' and provides and contextualizes most of the defining texts, and a lot more besides.--Keyan G. Tomaselli"Images; A Reader is a key resource for academics and others studying images and their interpretation. College-level collections, whether art history holdings or cultural studies collections, will find it intriguing."--James A. Cox (06/01/2007)A rich, well-considered volume that is bound to become a critical introductory text for students of images and images studies everywhere, as well as an essential resource for academics and practitioners alike. This reader is an invaluable tool for those interested in images and image studies across a vast array of disciplines.--Zoe Sadokierski-Images; A Reader is a key resource for academics and others studying images and their interpretation.
