Since this is a review, Ill not continue too much with reciting details just tell you the important details are there. For example you get detail information down to the level of what to say and even when to say it. Forget the common wisdom of first thing Monday morning, or any morning for that matter. Smith tells you why. And this is in the opening chapters. As you move through the book you will learn all of the details of how to create an effective cover letter, resume, deal with gaps in your employment record and much more. Summing up, Smith covers old school and new school issues. Old school psychology of dealing with the issues and concerns of gatekeepers/supporters and decision makers is discussed in a way you can understand it and use it. New school issues such as linked-in, video interviews and various ways to use or when not to use technology are equally covered.
