National Geographic Maps - Reference : Japan Classic [Laminated] (National Geographic Reference Map)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Japan Classic [Laminated] (National Geographic Reference Map):

0 of 0 people found the following review helpful. Nice map to get an idea of the countryBy mick paganNice map to get an idea of the country. We are visiting in a few months and this is good to get familiar with some of the larger cities and where they are located so we can gauge the distance between sites we may want to see or certain parts of the country things are you may read about.We also have a more detailed fold out map to get closer up.0 of 0 people found the following review helpful. Awesome mapBy CustomerLamination and detail are top notch. I do wish it was larger but it's not a deal breaker. I really like the fact it shows the airports.0 of 0 people found the following review helpful. Four StarsBy Home slicePretty good map

The signature Classic style map of Japan features a bright color palette with blue oceans and the country's terrain detailed in stunning shaded relief that has been a hallmark of National Geographic wall maps for over 75 years. The map includes thousands of place names, accurate boundaries, national parks, and major infrastructure networks such as

roads, highways, airports, and railroads. Coastal bathymetry is shown with depth curves and soundings. Inset maps provide detail of Japans Southern Outer Islands and the Ryukyu Islands. Information about the 2011 Tohoku earthquake and tsunami is included as well. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:3,115,000 Sheet Size = 25" x 29"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
