More than 1 star because there was some useful information in here if you have never had an interview before and can read it without cringing too much. I read it on the plane headed to an interview, and it did help calm my nerves, mainly for the comedic value. My biggest issues are the grammar and word choice. Despite the author's very common name, it does not read as if the writer has English as a first language. Not a big deal, just odd and made it distracting to read. The most annoying part for me was the fashion section. The assertions for women were sexist and silly. Tips on makeup were correct, but phrased in borderline insulting way. And insisting that women wear skirts..... Is this 1950???? No, I don't think so. Women, feel free to wear slacks and sensible shoes to an interview!0 of 0 people found the following review helpful. Real World AdviceBy JakeI have read several of this type of book and have heard the same boring tips over and over - and none have really helped me to differentiate myself from the rest of the pack - until now. In this great book, Gary Cooper provides content that has a real world backdrop - and really shows how to set yourself apart from the heaps of other of job seekers there are out there. The writing is insightful and shows you how to make your pitch relevant to the company to which you are applying. A must-read for job seekers in today's competitive job market! Highly recommended.
