Scored A 100K Plus Job...By David S.I recently found myself looking for a job which would provide me some career advancement but was a bit nervous about interviewing for a new company and for a higher level position. I purchased this book "Job Interviewing Guide" by David Claeys and read it from cover to cover. My confidence level was boosted tremendously. I learned what employers were mostly looking for and honed in on the items learned from the book. Using teachings from this book I was able to prepare well for the interview and felt I almost knew every question they were going to ask along with every attribute they were looking during the interview process. I landed the job after interviewing with three different people within the organization much like the book mentioned would happen and was offered the job after a brief negotiation of benefits. Note to all, my new employer is a larger sized company and did do an extensive background check as mentioned in this book might happen. So be prepared and honest all the way through the interview process. Nevertheless, I highly

recommend "Job Interviewing Guide" if you are seeking a new position. I landed a \$100K plus job after reading it, applying the learnings, and being keenly aware of what was happening during the entire interview process. 1 of 1 people found the following review helpful.
