We used this in planning the hike and also on the trail itself, and it excelled in both areas.For planning, we used the established campsites shown on the map to help us plan where we generally wanted to camp, and the elevation profiles were helpful as a quick reference to make sure our days weren't unreasonably strenuous, and that our itinerary positioned us well to get over passes early in the day. Of course, we strayed a bit from our planned itinerary once we were actually out on the trail, but the planning we did with this map gave us a great starting point.The map was the most helpful on the trail itself. We used it primarily for quick-checks on elevation (seeing how much more we had to climb), finding good places to camp (looking at both listed campsites and also relatively flat stretches along the trail), and mileage checks when we reached junctions or any other points with marked mileage. When we needed more precision, we used our GPS app (Gaia), which worked well in conjunction with the map. We didn't go off trail, so we didn't ever have to rely on the NatGeo map for any map and compass navigation. We kept the map in the outside pocket of a pack without extra protection, and there were no tears or faded ink by the end of the three weeks.I haven't seen the Harrison maps, so I can't make a comparison. But this NatGeo map guide met all of our needs, and we saw many other hikers using it along the trail. I'd recommend it to anyone doing the JMT. Happy trails!2 of 2 people found the following review helpful. I haven't even hit the trail yet,and I already love this map!By Mindie LehmanI haven't even hit the trail yet,and I already love this map!i love the compactness, and appreciate that it flips the pages in order from north to south.this Map will fit nicely into my waterproof map bag, and it has sturdy pages that i wont be afraid to pull out if it is raining.I found the Florence trail Map laid out, which i could not find anywhere online!Very pleased.6 of 7 people found the following review helpful. Above my expectations with quality and informationBy Adam EReally a fantastic waterproof pamphlet-style map of the JMT. So many little notations, icons, markings, etc. on this map. Can fit in your pocket since it's as wide as a shirt pocket. A bit heavy for a map, but it's 48 pages total (front and back cover, and each page half counted as 1 page). Total of 34 pages of map (17 maps, each takes up 2 half-pages), and there are 12 pages of very useful information in the front of this map pack including grids of distances between trail junctions, notable map points, etc. The printing is so clear, and the topo is very easy to read and understand. Great color shading and high definition. I'm going to be bringing this with me on the JMT this summer as my primary map.

Waterproof Tear-Resistant Topographic MapNational Geographic's Map Guide of the John Muir Trail is an indispensable tool for navigating one of the most famous trails in the United States. Expertly researched and created in partnership with local land management agencies, this product provides detailed topographic maps, interesting history, a waypoint table, information about wilderness safety, and key points of interest you will encounter along the trail. A resupply location chart shows shipping address/contact information, distances, and services available at each resupply point. Each map page has a detailed trail profile that shows the elevation changes you will encounter. Also, the John Muir Trail is highlighted and centered on each page so you can easily track your progress.The maps start at the northern terminus in Yosemite Valley and progress along the ridge of the Sierra Nevada, past Devils Postpile, and end at the highest point in the lower 48 on the top of Mount Whitney. Along the way you will pass through; Yosemite National Park, Ansel Adams Wilderness, Devils Postpile National Monument, John Muir Wilderness, Kings Canyon National Park, and finally, Sequoia National Park and Mount Whitney. A 21-day sample itinerary is included as well. Every Topographic Map Guide is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation.Other features found on this map include: Ansel Adams Wilderness, Bridalveil Fall, El Capitan, Illilouette Falls, Inyo National Forest, John Muir Wilderness, Kings Canyon National Park, Lake Thomas A Edison, Lower Yosemite Fall, Middle Palisade, Mount Agassiz, Mount Darwin, Mount Muir, Mount Pinchot, Mount Powell, Mount Ritter, Mount Russell, Mount Tyndall, Mount Whitney, Mount Williamson, Nevada
