Perfect scale for hiking and seem to be very accurate. 0 of 0 people found the following review helpful. cool By jakepv Nice map of the area. 3 of 3 people found the following review helpful. Good map + good paper = good product By The Funk This map is NOT, as a previous review mentions, just regular paper. It is tear resistant plasticized paper. I don't know if it's waterPROOF, but it's definitely water resistant. The map has good detail on trails, topography, and a great number of routes for the 4x4 roads in and around the park. I was only a bit disappointed that it lacked a couple of Joshua Tree Park features that a gas-station park map showed me. If you're just going for a day trip, you could get by with another, cheaper map, but if you're going into the back country, or on a weekend trip, this is a fantastic map to have.

All maps have color-coded symbols and trails, mileages between trail junctions, latitude/longitude, UTM grids, contour lines, vegetation, and elevations at trail junctions. Tom Harrison Maps is famous for the beauty and accuracy

of its maps.
