**Kaplan : Kaplan GMAT CAT 1999-2000 with CD-ROM** before purchasing it in order to gage whether or not it would be worth my time, and all praised Kaplan GMAT CAT 1999-2000 with CD-ROM:

None comes close to be this hard and it is worth every penny. There are three sets of practice CAT on the CD-ROM. I took each set twice. It preps me up for the real CAT. And in the end, I got the score of 700. I strongly recommend this product to anyone serious. It's much harder but it prepares you for the real thing. 12 of 12 people found the following review helpful. Worth it. By A Customer The Kaplan GMAT book/cd was worth the money I paid for it. I started with it in June and took all of the practice tests. Most of the techniques suggested in the book were common sense, but I still found the reinforcement and repetition helpful. It also helped build my 4-hour test endurance. Like all the other reviewers stated, the full-length Kaplan tests were unrealistically

difficult, so don't get discouraged. My scores on Kaplan's full-length CATs were 590, 600, 580. In August, I began using the ETS Official Guide along with their Powerprep software. I was told that they are the most accurate predictor of your eventual test-day score. This was indeed the case. I got a 710 730 on the Powerprep tests and then took the GMAT on Sep 13 and scored a 740. My advice: start with Kaplan, don't worry about your low-ball Kaplan scores, then move to the Official materials, get a fair idea of your scoring ability there, rest and relax, then tear it up on test day. You'll surprise yourself. Good luck! 12 of 12 people found the following review helpful. Excellent but math is hard. By A Customer I think that it is a good book overall. The key is the CD. (However, I wholeheartedly agree with the other reviewer who said the car thing was cheesy - boy, did I ever get sick of the music.) You should practice as much as possible on the computer and build stamina, etc. The math questions on the 3 full-length GMATS are ludicrously difficult, but after you've done them, you are ready for the the real GMAT math portion. The verbal seems pretty comparable with the real deal. The explanations are good, as are the shorter math and verbal practice sets. I recommend doing this and power prep (from the test administrators) for a total of 5 tests. For a frame of reference, I scored over 100 points higher (actually 140) on the real GMAT than my average on the three Kaplan tests. Good luck!

A comprehensive, multimedia prep for the computer adaptive GMAT with interactive lessons, practice questions, a personalized study plan, and more. The CD-ROM comes complete with more than ten tests worth of realistic practice questions and three, full-length sample GMAT CATs.

.com The GMAT Computer Adaptive Test (CAT) doesn't have to be scary. If you know what to expect, you'll have the edge, and Kaplan GMAT CAT 1999-2000 will fill you in on everything you need to know to do your best. Introducing the test and all of its sections, Kaplan staffers break it down into manageable bits, explaining how the questions are written and the best strategies for selecting the right answers. Different types of verbal and quantitative questions (like sentence correction and data sufficiency) are analyzed--and become much less threatening! Next, the authors outline the Kaplan Advantage™ Stress Management System, a set of simple solutions to the major blocks that cause test anxiety. Practice tests on paper and CD-ROM are the real meat of the package, though--each question and answer is thoroughly explained, and strategies for the CAT are outlined on the disk. You'll learn how it's set up, and how it differs from the traditional pencil-and-paper test, plus how these differences can help you raise your score. The book concludes with a section on getting into business school; after all, the GMAT isn't everything. Explaining where, when, and how to apply, these chapters take you through the application process with all the grace and skill with which they take you through the test. If business school is in your plans, pick up Kaplan GMAT CAT 1999-2000 to help you get there. --Rob Lightner
