Are you a young adult staring out the window (under your parent's roof) and wanderlusting your life away about living the life YOU want? Maybe that means doing what you love for a living, traveling the world, stealing from the rich and feeding the poor? Whatever it is.. You've got to start somewhere to answer the after college question of "now what am I going to do with my life"?! If you are ready to take that next step into the "real world"... A good start is probably figuring out how you're going to make a living to be able to afford the life you want! That's when career planning is on your mind. Don't know where to start?? I highly recommend starting with this book! Ain't no body got time to read while planning your life right?! No worries! This easy to finish book is clear, and straight to the point! John is funny, relatable, and real in his guiding you through the process. You'll feel like you're talking to a good buddy versus "being told what to do" (except for the "do it nows" in the book lol) Instead of watching that episode of trashy reality tv, or being toxic by comparing your life to others on social media, or getting drunk using money you can't afford to loose... INVEST IN YOURSELF. This book took me much less than an hour to read. Inside you'll find 5 easy to follow steps to begin your career planning journey. The time invested in each exercise introduced is ultimately up to you. But obviously if you're serious about your life.. You'll want to dive in more than just a quick minute or two. Enjoy! Happy career planning!

When it comes to career counseling, Mr. Salangsang is the go to guru. This is an easy to follow book with great step by step activities that will provide anyone who may feel stuck in their career interests a huge boost! The writing style of the author is on point as it feels exactly like if a career counselor is having a conversation with you unlike other books with technical jargon.Although the tone in my opinion is geared towards college students, I feel this book can work for middle schoolers and older.I highly recommend this book for anyone, or you can get one for someone you may know!

"Something you can quickly read and start taking action immediately."By CustomerIf you're debating whether or not to buy this book, take my advice and buy it. It's a short and concise (less than an hour of reading, more with implementation), so read it and pass it on to a good friend. There's no fluff as John states early in the book, "something you can quickly read and start taking action immediately." This is the most valuable aspect of this book, you won't get bogged down by jargon or flowery writing. He prompts you several times during the read to DO THE ACTION. Most people would agree that being well read or having a lot of education is all for not if you don't do anything with it.If you want a book that'll tell you that you're special and that all you need to do is dream and hope and send out positivity to the universe to get what you want..then this isn't the book for you. If you want practical advice that you can turn into immediate action, then check out, buy, or borrow this book now.

Do you know what job you want? May not be so easy to answer. Might even be harder to find directions on how to do it! If you are feeling any of the following: Cant confidently say, I know what job I want! Lost on where to begin career planning Frustrated because you cant make up your mind Then this book is for you. I wanted to write a book with simple tips and exercises to discovering the job you want. Something you can quickly read and start taking action immediately. After reading this book, youll be guided on how to make a decision and confidently say I KNOW WHAT JOB I WANT! Lets get started!?
