About the Author I grew up in an age when being a geek wasn't quite as fashionable as it is today. I used to subdue my nerdiness growing up in the 90's and early 2000's because of a perceived stigma I associated with it. But today? Well, let's just say I let my geek flag fly! Whether it's a new gadget, scientific discovery, piece of hard-to-understand software, or a complex but highly applicable math equation--I love discussing it and teaching it in easy-to-understand language to my peers and readers. These days I spend a great deal of my time learning and using different electronic devices and computer programs. I've found that the more I discover, the more I like to share with my readers. Plus, most electronics and computer technologies don't give you complete and user-friendly guidance--so I try to fill in the void as much as possible so you can benefit from it. I also love staying current with the world of Physics and Science, so expect to see more titles in these genres in the future. Thanks for visiting my page, and I hope I can provide you with tons of value in these books!
