They show campsites and shelters, which you usually have to scour the internet for. It shows trails and the distances--as well as the quality of the trail to some degree; for example, a black trail is well-maintained. A grey trail is THERE, technically, but isn't maintained by the park and might be obscure. I do wish the maps marked clear water sources (with, of course, the caveat that packers should always call the park to check on said source). Parking is clearly marked and if the portion of the part costs money to enter. It shows rock climbing areas. It shows fishing areas. These are also waterproof. I'm glad I keep it with me when I hike; I've run into a few hikers here and there who are turned around and I can show them where they are and where to go. The map is so clear that, literally, in about 30 seconds, the hiker knows what direction to go and some marks to look for (like a lean-to or lake). I also use this map to start researching a trip. I just put out the map and look at the distances and presence of water or whatever. If you see an area, for example, with A LOT of parking, that area is probably more congested than you want. I'd recommend this map to anyone of any hiking level.2 of 2 people found the following review helpful. Great map.By J. AdamsAwesome Map!Used on a trip to the ADK High Peaks and easily found Primitive camp sites, etc. It is a very big map, with a lot of detail. Some people may not love that about it because it takes up a lot of room in a pocket, but at the same time they would need multiple smaller maps to do the same job as this - again...taking up the same amount of room as this map.Definitely is waterproof, and is really durable. Thanks Nat Geo - great product. I'll be back for more products!5 of 5 people found the following review helpful. Great series of mapsBy Prime CustomerThis is the second time I've bought map 742, the first one did acquire a lot of wear and tear but was always useable. This new one seems to be identical plus the revisions, the main difference is the ink is a slightly lighter shade. Anyway, these are beautiful maps, durable and great for planning hikes. The mileages markers are well done and helpful. Probably would want something with more detail or a GPS for bushwhacking. The hundreds of lean-tos shown seem accurate, having been to a few dozen of them without problems. The main revision this edition of 742 won't include is that Duck Hole was wiped out by a storm in 2012.

**Waterproof Tear-Resistant Topographic Map**The largest park in the contiguous United States, Adirondack Park is a diverse mountain landscape of protected boreal forests and pristine waterways interspersed with over one hundred towns and villages. National Geographic's Trails Illustrated map of Adirondack Park combines unmatched detail with helpful information to offer an invaluable tool for making the most of your visit to this extraordinary region. Created in partnership with local land management agencies, this expertly researched map features key areas of interest including High Peaks Wilderness, Lake Placid, Sentinel Range Wilderness, Saranac Lakes Wild Forest, Lake Champlain, Giant Mountain Wilderness, Hurricane Mountain Wilderness, Split Rock Mountain Wild Forest, and Long Lake. An extensive High Peaks Trail Chart will help you choose a trail that's right for your activity level and recreation use whether you're hiking, horseback riding, biking, snowshoeing, cross country skiing, or snowmobiling. Trails are clearly marked and include mileages between intersections. The map base includes contour lines and elevations for summits, passes and major lakes. Some of the many recreation features include: campgrounds, trailheads, fishing access, boat launch sites, and interpretive trails. Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation. Other features found on this map include: Adirondack Mountains, Algonquin Peak, Ampersand Mountain, Ausable River, Basin Mountain, Boundary Peak, Dix Mountain, Gothics, Gray Peak, Iroquois Peak, Little Marcy, MacIntyre Mountains, Mount Haystack, Mount Marcy, Mount Skylight, Otter Creek, Owls Head Mountain, Sentinel Range, Split Rock Mountain, Street Mountain, Tupper Lake, Upper Saranac Lake, Vanderwhacker Mountain. Map Scale = 1:75,000 Sheet Size = 37.75" x 25.5" Folded Size = 4.25" x 9.25"

**About the Author**Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps,

recreation maps, atlases, and globes which inspire people to care about and explore their world.
