When I first saw this I was unsure of how detailed Mt. Tallac would be when the map covered such a large area. Once I received the map I was very impressed with how much detail they were able to squeeze in without sacrificing quality. I'll be buying these from now on for all of my backpacking needs.1 of 1 people found the following review helpful. I'd like to have at least a little overlap of the contents on each side -- other maps do that, this one doesn't.1 of 1 people found the following review helpful. Good map with lots of trails marked to exploreBy David G. KnightonGood map with lots of trails marked to explore. In addition, because it is a topographic map, it will be easier to find trails that are within my ability to hike. At 67 going on 68 years old that is really helpful. Nothing worse than hiking up a trail only to find nothing interesting to see at the top.
