I've just come from doing a road trip in Cuba, and this one was my go-to map. Recommended over any other. I've tried them all. 1 of 1 people found the following review helpful. Country Companion for Cuba By Tia Not only was this great on our trip but I gave it to our guide at the end who really appreciated not only the completeness of the map but also the ability to write on it and erase. I loved the fact that it never got wrinkly or wet on our many adventures, as well as keeping me (a bit geographically challenged) apprised as to where we were. Light and easy to use. Would highly recommend for a Cuba trip across the countryside. 2 of 2 people found the following review helpful. Good overview; not detailed enough for driving. By LoWo Very good overall map for getting your bearings and calculating distances. Not detailed enough for driving. For that, go with the International Travel Map (which unfortunately seems to cover only western Cuba). The two together should do the trick.
