The latest revision combines Fiala's passion for lilacs with the expertise of Canadian plantsman Freek Vrugtman, the international lilac registrar. The new book provides up-to-date information on the 21 known lilac species and 10 natural hybrids, as well as hundreds of the 2000 named cultivars. Five hundred color photos have been added, including some which show the newest introductions from Russia and Poland. It also provides fascinating details of the history, origin, and discovery of the species and of the people behind the development of the cultivars.
