I was really pleased with it, so I recommend it to everyone. I ordered the French version for myself and have been super pleased with it also- I have learned a lot, even just using the course on my own. so I thought I would give the Korean version a shot since that language really interests me a lot. I saw it was coming out and preordered it. got it as soon as it was released- arrived quickly. the price was great as always for such an extensive course. I could not be happier!!! the extra book on learning to read and write hangul is something most other courses don't give you- I finished it fairly quickly and have been amazed at how quickly ive learned to "read" hangul. I watch a lot of Korean tv shows (with English subtitles) but I have surprised myself now because I can now read the Korean subtitles that come up (I don't understand the meanings of the words yet but I am able to read the Korean with correct pronunciation) I think it gives you a really good basis- like a child learning to read, learning to write, sounds words out, etc. I have now moved on to the first lesson book and am learning quickly. perfect for the price- the series are always in depth, yet simple to understand. very happy and would recommend this to others. p.s. im an ESAL teacher so have experience with language teaching and find the living language method very good. it really works for me, as im a visual person and the reading and writing is what allows the language to "sink in" for me. the cds are also great too and are good for people who learn better by listening.2 of 2 people found the following review helpful. I enjoy learning languages and this is the first language I ...By EdI enjoy learning languages and this is the first language I have tried learning on my own (meaning not in a classroom) from the beginning. I already knew the Korean alphabet from YouTube videos (professor Oh to be exact). This has been awesome for learning the language! I use the CDs for my drives to and from work, and read the book and do the activities at home. I am more than halfway through the beginner book and I am surprised how much I remember what I have learned, considering I have taken a few several-week long breaks, I don't have anyone to practice with verbally, and my memory in general isn't fantastic. The website activities reinforce the book activities well also. I will be sticking with Living Language for this and whatever language I get interested in next!1 of 1 people found the following review helpful. Good material for their price!By linda whitfieldI really love this set! I actually feel like I've learned a lot by going through the materials in 1 week then I would in a class! The reading/writing book really helped me read better. I knew the alphabet already but I was having issues memorizing the vowels and writing korean. After a week it's MUCH easier! Plus, I watch a lot of dramas and variety TV shows. One thing I will say, is that there are some errors in their book. Someone who's just starting probably would not notice the errors. That's why I took off a star...
