Deborah J. Bedford AAS CMA, Michaelann M. Allen CMA : LWW's Visual Atlas of Medical Assisting Skills before purchasing it in order to gauge whether or not it would be worth my time, and all praised LWW's Visual Atlas of Medical Assisting Skills:

0 of 0 people found the following review helpful. Great for students and practitioners alike. By Andrea A. Naert A must-have for MA students and a great addition to any clinic setting. Great descriptions and detailed photographs. 1 of 1 people found the following review helpful. A Must Have Book for Medical Assistants. By scoobiedawg This is a beautiful full color book, with step by step illustrations for just about anything a MA may be required to do. An excellent review source, and with the full color pictures demonstrating each step, very easy to read and understand. I think that every MA should own one of these books. 1 of 1 people found the following review helpful. Excellent Resource. By Lovin Learnin I found this book extremely helpful. It was written using medical terms w/ further

explanation for those who may be unfamiliar w/some of the terms. Using real pictures and real common sense explanations; great book for those who like and understand when things are kept simple.

This unique photographic atlas provides step-by-step instruction on how to perform a wide range of medical assisting skills, with more than 1,200 photos visually depicting the 61 CAAHEP entry-level competencies that students must master to pass the test to become a Certified Medical Assistant. The atlas is an excellent companion to any medical assisting text or study guide, giving you a fresh and dynamic way to review, practice, and master all competencies with ease.
