I got this map two years ago, and have used it on two weeklong trips near the Mono Pass trailhead in Yosemite and in the Ansel Adams wilderness.I didn't notice any errors in trail mileage in the areas where I was.I've carried this map through rain and snow, and it's still in good shape.0 of 0 people found the following review helpful. Great for trip planningBy GunnyThe Tom Harrison maps each cover a lot of area and are perfect for planning your backcountry trips. Because of the large areas they cover the detail isn't very close-up so definitely not good for backcountry route finding if doing anything above class 1. If needing a map to navigate by when going cross country then this isn't the map to get. They do work well in conjunction with my gps if I stay on trail though which reduces the # of maps I have to take with me and less is always a good thing when it comes to my backpack weight. They are also waterproof which is pretty much a necessity in my opinion. Very happy with this purchase for what I use it for...trip planning.0 of 0 people found the following review helpful. Dreaming of hiking the Sierras.By E. L. McRaeThis map is nice for a closer look at a possible backpacking trip out of Mammoth. Great detail, well done.

Shaded relief topo map. Scale:1:63,360, (1 inch represents one actual mile), 2005 Printed on waterproof and tearproof material. Mammoth High Country area is one of the most popular getaway and outdoors activity areas in California.
