**Jeff Mowta : Marijuana New School Outdoor Cultivation** before purchasing it in order to gage whether or not it would be worth my time, and all praised Marijuana New School Outdoor Cultivation:

5 of 6 people found the following review helpful. Not really an outdoor book...By SaltyDogA few things are in the indoor grow book. The biggest chapter, chapter 3 is on outdoor cultivation systems. Most of these outdoor systems really seem like indoor systems to me. I was expecting more about soils and finding grow areas. If your looking for an outdoor grow book that more about outdoor growing, you can skip this one and pick up Jorge Cervantes guerilla growing, or marijuana growers handbook by Ed rosenthal.

Featuring cultivation systems that range from simple just-add-water gardens to sophisticated aeroponic and hydroponic systems that produce the most potent pot, this outdoor grow guide ensures that even the most novice grower can quickly become a master gardener. Included are in-depth chapters on building and maintaining systems, germinating and cloning, predator and pest control, making fertilizer, pruning and bending plants, sexing, flower forcing, breeding hybrids, and creating pure strains. The books clear instructions are supported by more than 60 illustrations and nearly 200 photographs.
