DisappointingBy Tom JasperI purchased this book to improve my knowledge of Marx Trains and to help me to estimate the value to my Uncle's pre- and post-war toy trains. Given that this is the guide's 9th edition and that I have found the Lionel version of the Greenberg's pocket guide to be comprehensive, I thought the book would be very useful. Specifically, I wanted to check the value of Marx boxed set 15220 which consists of twin Santa Fe FT metal diesels with 3 metal freight cars (see attached pictures). I quickly discovered that the guide does not provide any value assessments for sets. Moreover, set no 15220 falls in the range of 15000-15999 which the guide describes as "Prewar sets with 6-inch 8-wheels having automatic couplers." The set was offered in the postwar time period, so the description is incorrect. At this point, I fall back to individually pricing the items within the set. I find the Santa Fe FTs and the 1950 Green Box Car priced which is helpful, but the 1951 Red Caboose cannot be found in the guide. Bottom line for me is I found the book to be disappointing.1 of 1 people found the following review helpful. Covers Joy Line, Original Marx, and New MarxBy Rick R.This is a handy little book to help guide you through many of the available and not so available Marx train pieces and accessories. Use the prices as comparison to other units only as many are lower than current value and others are higher. I use the guide regularly as I search for items I need.0 of 0 people found the following review helpful. Three StarsBy Lloyd A. Tompkinsanother price guide is all
