**EPC Ltd. : Math Collection Light** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Math Collection Light:

6 of 6 people found the following review helpful. Good variety, but lots of bugs  
By A Customer  
This CD is helpful in that it has a wide spectrum of math problems to choose from. Also, the hints are helpful in teaching the math principles and theories. The only problem is that quite a few of the problems have errors in the calculations and/or answers. This leaves the student wondering where he went wrong until he figures out the "answer key" is wrong. This tends to invalidate the accuracy of other answers. Bottom line: lots of great problems, but the publisher needs to work out the mistakes in the answers.  
4 of 4 people found the following review helpful. It's very good!  
By Derek Taylor  
I always had problems with practicing math, because I had difficulties in checking my solutions without any help. But this collection beseems all my expectations. Since the tasks are totally detached from the solutions, I can handle them separately. So I see the solutions only when I have finished the exercise. The solution box contains not only the payoff but the step-by-step solution I can check all the details of my own work. And if I don't thrive alone, it means the help for me.  
1 of 1 people found the following review helpful. A very useful product!  
By Lilian Preston  
It contains not only 15,000 math problems but 15,000 step-by-step solutions and useful hints covering all types of problems. Exercises are printable and editable so I can compile my own worksheets for practicing. I recommend this CD-ROM to everyone who wants to study math in an enjoyable way.

Solve 15,000 challenging problems. Practice and test your skills in 15 math subjects. Study the solutions to discover

the correct answer.
