I love wine and I love cheese and I sure love having them together, but I Have no clue what I'm doing. I would always just guess and get cheeses that I liked, but that didn't necessarily pair perfectly with the wine I was having. This lets you choose either a cheese to pair with a specific wine or a wine to pair with a specific cheese. It's helped me look a little fancier at parties I'm hosting and they have no idea how easy it is :) Great tool for those who love to host, love wine, and love cheese!!0 of 0 people found the following review helpful.
