**Carter A. Daniel : MBA: The First Century** before purchasing it in order to gage whether or not it would be worth my time, and all praised MBA: The First Century:

An invention of twentieth-century America, the MBA degree has grown from tiny beginnings to become one of the

two most popular graduate degrees in the world. Although scorned at first by business as too theoretical and loathed by universities as indecently practical, it nonetheless became the fastest growing phenomenon in the history of education. This book traces the challenges the MBA has faced and the changes the degree has undergone during its amazing and colorful first century.
