am a nursing student and I use this all the time. It's small and I carry it in a backpack for easy use when I'm studying. I can use my phone however I like less distractions when I study so I stick to books and keep my phone away. 2 of 2 people found the following review helpful. It works By shopper Great for the price. Teachers and other medical professionals do frown on this though and may tell you it is not a reliable source. If you are going into school for anything medical related I would recommend another brand. If you are in a pinch for cash then this works okay. 0 of 0 people found the following review helpful. Great dictionary! By May Plenty of medical terms that you can learn about and it's been helping a lot with the course I'm currently taking!
