National Geographic Maps - Reference : Mexico Classic [Tubed] (National Geographic Reference Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mexico Classic [Tubed] (National Geographic Reference Map):

3 of 3 people found the following review helpful. An excellent trip planner
By Nigel Thompson
The map arrived in perfect condition in its tube. The tube was packed in a box. I cut the border off the map and mounted it with spray glue on poster board so I can put pins in it. It's perfect for trip planning. I particularly like the annotations of cultural sites and mountains.

By Edie
Our government's current crackdown on immigrant communities has made me feel ashamed to be so ignorant of just who are my Latino neighbors. This map has been a great help in opening my eyes.

By Linda
I love the map! It helps me learn more about Mexican history and geography!

National Geographic's wall map of Mexico is one of the largest and most detailed maps of the country. The signature Classic style design uses a bright, easy-to-read color palette. This map features thousands of place names, accurate political boundaries, national parks including Cumbres de Monterrey National Park, biosphere reserves including El Vizcaino Biosphere Reserve, archeological sites including the ruins of the Yucatan Peninsula, and major infrastructure networks such as roads, canals, ferry routes, and railroads. Mexico's diverse terrain is detailed through accurate shaded relief, coastal bathymetry, and symbolism for water features and other land forms. Elevations of major peaks are expressed in both feet and meters, and depth soundings are expressed in fathoms. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:4,370,000 Sheet Size = 34.5" x 22.5"

About the Author
Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
