Roger L. Williams : Military Register of Custer's Last Command (Hidden Springs of Custeriana) before purchasing it in order to gage whether or not it would be worth my time, and all praised Military Register of Custer's Last Command (Hidden Springs of Custeriana):

3 of 3 people found the following review helpful. A welcome clue for ancestryBy Cooper-TowlerThis book helped me debunk and clarify my family legends about my great-grandfather. He was rumored to have been wounded just before the Battle of Little Bighorn, and so did not ride to the last stand. This book contained enough military records (which I

was having trouble obtaining from the National Archives) that I was able to prove great-grandfather's service and that he was wounded at Reno Hill, as well as getting at last a clue where he was born. 8 of 8 people found the following review helpful. Highly Recommended By Michael L. Nunnally A must for any serious student of the Battle of the Little Big Horn. Certainly equal to, or surpassing, Hammer's "Men With Custer" as the standard for Custer research. Mr. Williams has studied the battle since the 1960's and has created a top level research book. Couldn't put it down. Highly recommended. 1 of 1 people found the following review helpful. An in-depth and meticulous labour of love. By Aurele Freynet Strickly for the advanced Custer student who can't get enough of minute facts about the 7th Cavalry. Once you make the effort to master the abbreviations, the text offers up a wealth of information on all personnel involved. This dry but essential resource tool will set the standard for at least the next decade in terms of Custer and company.

With so much written about the actual battle at the Little Bighorn on June 25, 1876, Roger L. Williams has now compiled a wealth of data concerning the men of the 7th Cavalry at the time of the engagement. Military Register of Custers Last Command presents for the first time the complete military history of every enlisted man on the regimental rolls, with particular attention devoted to the well-known campaigns from the Washita to Wounded Knee. Williams has culled a vast amount of primary-source material, much of it never before published, to shed new light on Custers forces and provide previously unknown names for several troopers. As a reference for future historians, the book includes for the first time the 400-plus pension-file and personal-file numbers for Custers troops. The volume also offers new information on Custer himself and on the civilian mule-packers and American Indian scouts who accompanied the expedition. As the first in-depth analysis of the statistics related to the battle, Military Register of Custers Last Command is the most extensive work available on the 7th Cavalry. With its exhaustive bibliography, it will stand as a definitive resource for historians and enthusiasts and a tribute to all enlisted soldiers on the western frontier.

From the Publisher Roger L. Williams has spent 46 years researching the 7th Cavalry and the Battle of the Little Bighorn. About the Author Roger L. Williams has spent more than 45 years researching the 7th Cavalry and the Battle of the Little Bighorn. Now retired after a 43-year career in the commercial airline industry, he resides with his wife in Arizona.
