Belinda Gallagher : Mini Encyclopedia - Sharks before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mini Encyclopedia - Sharks:

0 of 0 people found the following review helpful. Sharks in small dosesBy AThis was very well done. The sections are short but filled with enough information for quick references. The images are nicely done. I especially like that they include information about shark mythology and what people use sharks for in food and medicine as well as ways people are saving sharks.

MINI ENCYCLOPEDIA - SHARKS is the mini/pocket book crammed with masses of knowledge about these underwater predators. This amazing encyclopedia for kids is small enough to slot into school bags, making this a fantastic resource for school projects and homework at key stage 2. Filled with interesting bulleted facts including information about shark species Color-coded sections help children distinguish between different shark species and

their characteristics Brilliantly detailed artwork by top illustrators brings sharks to life on the page for children. The ultimate shark book for kids, *Mini Encyclopedia Sharks* is a compact, comprehensive children's encyclopedia that uses clear, bulleted facts and incredible info panels to explain everything from a shark's life in the water to different shark families. Every topic is supported by photographs, realistic artwork and detailed diagrams, and color-coded sections make navigation through the topics easy and quick. Chapters and topic examples of *Mini Encyclopedia Sharks*: Life in the water: Swimming skills, Food and feeding, Meeting and mating, and Friends and enemies Shark families: Types of shark, Frilled shark, Sixgill and sevengill sharks, and Prickly and bramble sharks Dogfish sharks: Mandarin dogfish, Lanternsharks, Greenland shark and Cookie-cutter sharks Angelsharks: Types of angelshark Sawsharks: Longnose sawshark Bullhead sharks: Horn shark and Port Jackson shark Carpet sharks: Blind sharks, Bamboo sharks, Zebra shark, and Whale shark Mackerel sharks: Goblin shark, Sand tiger shark, Crocodile shark, and Great white shark Ground sharks: Catsharks, Houndsharks, Leopard shark, and Weasel sharks Requiem sharks: Grey reef shark, Bull shark, Tiger shark, and Lemon shark Hammerhead sharks: Winghead shark, Bonnethead shark, Scalloped hammerhead, and Great hammerhead Shark relatives: Manta rays, Stingrays, Skates, and Chimaeras Sharks and people: Living with sharks, Attacks, Survival Stories, and Sharks in captivity Shark science: Studying sharks, Shark fossils, Endangered species, and Saving sharks Amazing facts for kids to learn include: Many sharks visit cleaning stations where small fish and shrimps remove dead skin and parasites from their bodies even from inside their mouth or gills. Whale sharks are thought to be able to give birth to up to 300 pups at a time. After scientists found out how shark denticles reduced drag, a swimming costume company designed a swimsuit that worked in the same way.
