How 'bout that?By SierraHoosierA little less detailed than the National Geographic map, but it's all on one page which is nice. On the other hand, you should stay out of the entire area this map covers because it all belongs to me.I tease. Come enjoy one of the most beautiful places on Earth and bring this map and a full tank of gas and plenty of water with you.2 of 2 people found the following review helpful. Really love this mapBy Tanner HarbinReally love this map. I purchased the National Geo map at first and I hated it. That map is on two sides and worthless if you're using it for the Old Mojave Road. This map is perfect for that. The entire road is highlighted green and the map is all on one side. Very easy to read.0 of 0 people found the following review helpful. Good Map, But Small Roads MissingBy CustomerBest map I have of the Mojave Preserve. Still missing lots of the smaller roads though, it's better than most maps out there.

Mojave National Preserve is one of the newest National Preservation Areas, located South of Hwy 15 and North of Hwy 40 in Southern California. A frequently visit but due to its vast territory, rarely crowded.This map is GPS compatible, with a complete UTM Grid, printed in waterproof and tear resistant material.Beautifully composed over original USDS topographical information, enhanced with shade relief and precise information about trails and existing roads.Includes:Cima Dome, Mojave Road, Mid Hills, Hole-in-the Wall, Providence Mountains, New York Mountains, Kelso Dunes, Weethump Joshua Tree Wilderness.Scale 1:190080 (1 inch represents 3 miles). Contour lines interval representing 200 feet. Designed and published by Tom Harrison Maps.
