James McKelvy : Music for Conducting Class before purchasing it in order to gage whether or not it would be worth my time, and all praised Music for Conducting Class:

(Book). Conducting is an art which demands much beyond the movement of one's arms. This helpful resource provides 66 examples of music for the beginning conducting student. Since the basics are the same, it is intended for both choral and instrumental majors. The book is divided into eight parts, opening with 3/4 meter. The examples progress from the easiest, "America," to the closing examples of double-choir writing.
