From Smithmark Pub : My First Book of Knowledge before purchasing it in order to gauge whether or not it would be worth my time, and all praised My First Book of Knowledge:

2 of 3 people found the following review helpful. Excellent child orientated book! By PrairieSun This is a fabulous book to have in your home. The book is broken into 3 main sections, World Geography, Fun Facts, and Amazing Animals. Each page covers a different topic with lots and lots of great color drawings. A fun picture book for those who can't yet read. The text is laid out in an easy to read format. With well thought out "Can you see?" or "Do you know?" sections, it makes it easy to spend time sharing this book with children. The information is interesting and brief, making kids want to read it themselves. Adults are sure to enjoy this book too and will definitely learn a fact or two themselves.

This lively and informative book is bursting with facts and information on every subject, from art to animals, from science to sport and from history to the human body. Its superb illustrations make it an ideal introduction to our amazing world for all children aged 5-9 years. From the invention of the wheel over 5,000 years ago, right through to the dizzying heights of modern-day space travel, children's eyes will be opened to the fascinating and diverse world that we live in. How does a spider make its web? How long is the Great Wall of China? Who was Captain Cook? What kind of animal is a dunnart? And who invented the electric light bulb? Young readers will enjoy dipping into this book with its fully illustrated spreads and clear, explanatory text. A special fact strip, 'Look and Learn' panel or 'Can You See?' feature appears on each page, highlighting exciting facts and providing simple explanations. The colourful pictures throughout will grab the attention and fire the imagination of any child, making this a superb first learner's study aid, fun fact primer and inspirational source of knowledge. A lively and informative book bursting with facts on every subject from art to animals, science to sport and history to the human body. Find out about the amazing world we live in: different countries, outer space, prehistoric life, the animals of land and sea, and much much more. Includes over 850 magnificent full-colour illustrations. Fantastic illustrated maps of continents and countries. Ideal for young readers aged 5 and upwards.

About the Author Andy Charman is the prolific author and editor of many educational and fun children's reference books.
